Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 120-132 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chishti et al. (5,975,893) in view of Lehmann et al. (6,575,751). Chishti et al. discloses a method of providing a custom orthodontic appliance for repositioning teeth of a patient comprising providing for display on a computer screen, with interaction by an operator (user), data of images of the teeth of the patient in suggested post-treatment tooth positions and orientations (final digital data set) based on three-dimensional information of the shapes of the teeth (column 5 line 37), receiving feedback information from a person (treating professional), other than the operator, and providing a custom orthodontic appliance configured to reposition teeth based on the suggested post-treatment tooth positions and orientations. It is noted that the interactive step is written in the past tense, and interactivity can be interpreted as with the computer system. Furthermore, there is suggestion as to various times when "users" can provide feedback as in information to modify (change) or accept (not change) tooth positions and orientations in obtaining post-treatment tooth positions and orientations (columns 4-7, 9-14). However, Lehmann et al. is used to teach a situation in which the person, treating professional, or orthodontic practitioner (dentist) does not have access to the computerized site and uses the services of another such as that of the operator, user, or laboratory, and interactivity is present in

the method of providing a custom dental appliance. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the person who has interactively viewed a display of the images as understood as in Lehmann et al. in order to enable the person to save time and effort in communicating with the laboratory operator in view of Lehmann et al. As changes are incorporated, it is redisplayed.

Response to Amendment

3. The declaration filed on September 19, 2007 under 37 CFR 1.131 has been considered but is ineffective to overcome the Lehman reference. It is not clear what the evidence states with respect to the claimed subject matter and whether the declaration includes the elements of the reference it is trying to overcome. In particular, paragraph of page 4 is not understood as to its relevance to the subject matter of these claims. Furthermore, the declaration does not identify the individuals comprising the applicant for all the claims of the claimed subject matter and the affidavit/declaration should be executed by each of those individuals.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melba Bumgarner whose telephone number is 571-272-4709. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached at 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
